

WYNYARD PLACE

COMMUNITY UPDATE – MAY 2017

Works for Wynyard Place will continue throughout May, with the following activities underway:

Construction activities

- Partial footpath closures will be in place along Carrington and Margaret Streets in May to allow hoarding support systems to be installed. Pedestrian access will be maintained at all times.
- A temporary overhead protection system has been installed around the northern end of Carrington and Margaret Street.

Demolition activities

- Internal hard demolition works will continue to the Menzies Hotel and 301 George Street buildings.
- Demolition materials will be removed Monday to Friday 7am-7pm and 7am-5pm on Saturday with the majority of material being removed by truck from the Carrington Street construction zone and Wynyard Lane.
- The three electrical substations within the site will be decommissioned during the first week of May, resulting in partial road closures at night on Margaret Street. Traffic control will be in place.

Pedestrian and vehicle pathway changes

- Pedestrian access to the station from George Street will change during the Easter and Anzac weekends.
 - Access via the northern concourse ramp will close with all future access via the newly remodelled southern access walkway south of the Hunter stair. This access will remain operational until the new transit hall structure is complete.
 - Access to the Hunter Connection will be maintained during this time.
 - Wayfinding staff will be in place during all pedestrian access changes.
- Northern access to Wynyard Lane remains open to construction traffic only. All other vehicles are to access Wynyard Lane from the southern end. The volume of construction vehicles and movements will increase as hard demolition continues.
