

WYNYARD PLACE

COMMUNITY UPDATE – August 2018

Works for Wynyard Place will continue throughout August, with the following underway:

Construction Activities

- Construction of the new transit hall above street level will progress.
- Heritage facade restoration works on Shell house will continue.
- Demolition of the pedestrian access from the station through the Hunter Tunnel (i.e. Phase 2 Pedestrian) is now underway.
- Demolition of the floors within Shell House will be completed during the month.

Pedestrian and vehicle access changes

- The Wynyard Place project has transitioned from the old pedestrian access route to George Street into a new pedestrian access route to George Street (i.e. Phase 3). This is now the permanent pedestrian pathway.
- In order to provide a refreshed, accessible, and modernised pedestrian access from Wynyard Station through to the Hunter Connection and Hunter Arcade, the tunnel under George Street is now temporarily closed for approximately 12 months.
- Vehicular crossing of the footpath on Carrington Street to access the site will continue throughout August. New traffic and pedestrian controls (i.e. barriers and operational staff) have been implemented to manage pedestrian safety.
- Margaret Street works zone is operational from 7.00am to 7.00pm Monday to Friday and 7.00am to 5.00pm on Saturdays.
- Hours of use of the Carrington Street works zone are 7:00am to 7:00pm Monday to Friday, and 7.00am to 5.00pm Saturdays. The works zone reverts to a taxi rank outside of these hours. Access for non-construction vehicles from the southern end of Wynyard Lane will be maintained throughout the project.
